

Project Demo Planning

Date	03 July 2026
Team ID	XXXXXX
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

The OptiCrop demonstration is planned to showcase how the application helps farmers choose suitable crops based on soil nutrients and environmental conditions. The demo will cover the complete workflow, from entering input values to receiving crop recommendations and suitability analysis. Responsibilities are divided between the two team members to ensure a smooth and well-organized presentation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Explain the agricultural problem, project objectives, and motivation behind OptiCrop.	2	Member 1
2	Solution Overview	Present the system architecture, technology stack, workflow, and machine learning approach.	2	Member 1
3	Crop Recommendation Demo	Demonstrate how users enter soil and climate data to receive crop recommendations with confidence scores and farming tips.	4	Member 2
4	Crop Suitability Analysis	Demonstrate suitability checking, suitability percentage, and parameter gap analysis for a selected crop.	3	Member 2
5	Deployment & Project Structure	Explain the project structure, flask application, Github repository and api integration.	2	Member 1

6	Conclusion & Questions	Summarize project outcomes, future enhancements, and answer questions from the evaluation panel.	2	Member 1 & Member 2
---	------------------------	--	---	---------------------

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the challenges farmers face in selecting suitable crops and how OptiCrop addresses these challenges.
2	Solution Overview	Briefly explain the project architecture, frontend, Flask backend, machine learning model, and project workflow.
3	Live Feature Demonstration	Demonstrate Crop Recommendation, Top 3 Predictions, Farming Tips, Crop Suitability Analysis and Parameter gap analysis using the flask web application.
4	Q&A Session	Project runs as a Flask web application on the local system. Deployment has not been completed yet and is planned as future.
